Venturenox
12/2021 - 06/2020 — *Lahore*
Venturenox works exclusively with early stage startups, and specialises in skills necessary to build modern software.

Achievements/Tasks
- Backend development using Node.js, Dockers, ORMs, Knex, etc.
- Building scalable applications and deploying them on AWS.

PERSONAL PROJECTS (RECENT)

Food Lab (01/2021)
- Food Ordering SaaS app based in Australia

G2G (05/2020 - 02/2021)
- Ride ordering application for Australia based company.

Blueworld Dharavandhoo (05/2019 - 08/2021)
- Hotel Management Portal in Maldives

EDUCATION

Bachelors in Software Engineering
University of Management & Technology
02/2021 — *Lahore, Pakistan*

Courses
- Machine Learning
- Big Data
- Data Science
- Data Mining

SKILLS

Node js · PHP · Django · React Js · Flutter · React Native · Java · Dynamic Programming · Laravel · Rest APIs · Python · Project management · Time management · Performance improvement · Debug software · Apache Spark · Keras · Tensor Flow · SystemML · IBM Watson Studio · Machine Learning · Data Mining · Data Visualization · PCA · Deep Learning · AWS · AWS Lamba · EC2 · AWS SQS · AWS Elastic Beanstalk · AWS S3 Buckets · AWS CodeCommit · AWS CI/CD Pipelines · AWS Pipelines · AWS MLOps

CERTIFICATES

Generative Adversarial Networks (GANs)
The DeepLearning.AI Generative Adversarial Networks (GANs) Specialization provides an exciting introduction to image generation with GANs, charting a path from foundational concepts to advanced techniques through an easy- to-understand approach. It also covers social implications, including bias in ML and the ways to detect it, privacy preservation, and more.

Advanced Data Science with IBM Specialization (09/2021)
This is a part of the IBM Advanced Data Science Certificate which gives us easy access to the invaluable insights into Deep Learning models used by experts in NLP, CV, Time Series Analysis, and many other disciplines.
